

# Sensory Processing

## Sensory Modulation

Hyper-reactivity (ex. aversive and defensive reactions)  
Hypo-reactivity (ex. poor registration)  
Mixed reactivity  
Filtering

Regulation (attention, emotions, physiological state)  
Sense of safety & well-being

Coping  
Social interactions  
Participation

## Sensory Perception & Discrimination

visual  
auditory  
tactile  
gustatory  
olfactory  
vestibular  
proprioception  
interoception

Body schema  
Praxis

Skill development (perceptual skills, motor skills, play skills, social skills, self-care skills, organizational skills, etc.)
